Remission of the loan granted to the Laharpur Municipality -

Mr R. L. subject No 304 of 909

No.	Dated	Received

ary No. 697	Enclos - Spare Copies -	Serial No. 1

BRIEF ABSTRACT OF LETTER.

Prays that the balance of the loan granted to the Laharpur Municipality on account of water works may be remitted and represent that the water supply is not satisfactory at present

NOTES AND ORDERS

In this reply the Govt: have noted the prayer and have stated that the question of water-supply will be further considered.

2 As regards the remission of the balance

balance of the loan, attention is respectfully invited to G O of the 23rd Feb. 1909 wherein the prayer was declined The total amount of loan advanced on account of water works (i.e the Amount spent) was Rs 13,800/- and the balance of the loan to be recovered was Rs 7500/- on the 30th June 1909.

3 In reply to the representation made in 1908 for improving the present system of water supply, Govt states that nothing could be done in the matter until the Municipal Council improved their resources (vide MB 290-'08)

Submitted for orders

9.1.10

So long as the Municipalities are in their present Chronic Insolvency Condition the Working of Clauses 60 & 61 will only embolden them to persevere in their present listless attitude and prevent them from bestirring themselves for finding out ways & means for an Expansion of their Revenues & Establishment Expenditure. It would also have a demoralising effect on them when Government Can go to their help when it is necessary and bring down Govt help and help of a Contribution, Sustaining Loan is a matter of Contract and Govt must be Written off cash. If the Municipality had at their Credit a sum equal to the Loan they are and they were forced to the loan from incurring useful Expenditure perhaps the Writing off the loan as a Contribution to the Municipality may be Considered. But present Circumstances

Serial No

a new main laid to the highest point of a town with a storage tank, & he also opines that a further expenditure Rs 10000 to Rs 12,000/- would bring to completion the Scheme.

36 The minimum cost of working the Pumping Plant is estimated at Rs 3,000/ a year

37 The Mel CL pray that the cost of the Scheme may be borne by Govt in its entirety, the Mel CL defraying annual working Charges.

38 The Mel CL also pray that the balance of the loan amounting to Rs 5,500/ against them may be excused on the ground that the present water supply Scheme does not benefit the majority of the Citizens.

39 The prayer of the Mel CL to write off the loan seems to deserve the favourable consideration of Govt for the reason that the supply is very inadequate.

40 The necessity for a good water supply to the entire town is apparent to all

NOTE—Contin sheet

but there is no likelihood of the Mel Cl financing even a part of the scheme even in the distant future they request Govt to meet the cost of the scheme entirely In this connection it is submitted that in the case of Chinglepet Municipality the Govt have decided to construct a subsidiary Water supply reservoir at a cost of Rs 40,000/ from the State funds

2 D No 2942 5 Ml 341-08 6 dy 8 10 1912

41 The financial condition of the Municipal Cl for the current is as estimated below

Ml Cl propose to levy the Water rate at the same rate as the House tax If this course be feasible, the income wh may be derived from this source may also be put down at Rs 1335

(II) The average annual expenditure on water maintenance wks only Rs 300

(III) No remarks may be taken at Rs 750.

(IV) Data has not been furnished. The figure furnished may be accepted Rs 250

Total Rs 2,635.

Thus, there is a deficit of Rs 365. This amount has to be found from the surplus annual revenue, the average annual income and expenditure, excluding debt heads, having been Rs 5,823 and Rs 5,349 respectively.

5) From the above it would appear that the Ml Cl by imposing a Water rate and by revising the existing taxes may be able just able to meet the Annual Maintenance charges, but they are quite unable to pay for the depreciation charges. The revision of taxes is expected to yield only abt Rs 250/ as

* Rs 250/ expected from revision of taxes is not taken into account

to bear the annual maintenance charges of the water works by improving their revenue

56 The result of the transactions the Munsply for the 5 years ending with 1912-13 has been to leave but a small saving of Rs 500 per annum and the closing balance at the credit of the Munsply at the end of 1912-13 was Rs 9000 The income and expenditure during the above 5 years continued steady and showed no notable fluctuations The idea of meeting the maintenance charges by improving the revenue seems too sanguine and may not be realised

57. With such a small revenue as about Rs 5,823 per annum it is not probable for the Munsply to be able to meet the annual maintenance charges of Rs 3000 even though a water tax may be levied and the other taxes be revised Further it has to be borne in mind that the maintenance charge of Rs 3000 is only the minimum and may increase. The Municipality will have to find at least this extra amount and as this is a very large sum compared with its total revenue it is practically certain that they will not be able to maintain the water works, and even if they were to do so it would be to the detriment of other necessary sanitary and other public works

58 At present the Municipality is

so as to clear the way for Govt making a free grant of an improved water supply to the town

67. As however, owing to the towns inability to meet the recurring charges, the project for improved water supply cannot be immediately sanctioned, it is respectfully submitted that the promise partially held out in the reply to D R-A subject No 310 may be given effect to and the balance of the outstanding loan graciously remitted, as such a course will enable the Municipal Council to improve its finances rapidly.

flag W

68 That Govt. once intended to favourably consider the matter is also seen from the Councillor's note in para 4 supra The amount due then was Rs 7,500 but now it is only Rs 5,500

Similar sympathetic treatment has been extended to Chittalong and Kolar Municipal councils, though much larger sums were involved in those cases, i e Rs 10,400 and Rs 28,737 respectively A further grant in aid of half the cost of improvements to the Kolar Water works is also under contemplation, while in the case of Cuddapah, as large a sum as Rs 40,000 was sanctioned under similar circumstances

MYSORE P W DEPARTMENT,
CENTRAL OFFICE
Bangalore, 22nd September. 1910.

From

M VISVESVARAYA, Esq, MICE,
Chief Engineer of Mysore,
Bangalore.

To

C.S.Balasundaram Iyer, Esqr., B.A.,
Offg: Secretary to the Government
of His Highness the Maharaja of Mysore,
General and Revenue Departments.

SIR,

With reference to your letter No.9322½/M1. 308-09-2 dat the 16th April last, inviting attention to subjects Nos.304 and 313 brought forward at the Dasara Representative Assembly of 1909, compl: ing of the unsatisfactory condition of the Hunsur water supply and r: questing that the present system be examined with a view to see if i can be improved without much additional cost, I have the honour to fo ward the enclosed copy of docket No.434 dated the 2nd July 1910 con- taining the report of the Executive Engineer, Water Supply and Store: Division, on the subject. From the report it would appear that the - present filter beds and pure water tank are in order but that owing to their situation, they do not command about three-fourths of the - area of the town. A new pumping plant will be required to give a pressure supply to all parts of the town.

2. The Executive Engineer roughly estimates the cost of a pumping scheme at Rs.35,000 with an annual recurring expenditure of Rs.4,000. But Government have observed, in their Proceedings No.4023-4 M1.286-06-6 dated the 7th November 1907, that unless the Municipal Boa are in a position to bear the entire cost of maintenance and a part o

the initial outlay, there is no prospect of the scheme going through.

3 The President of the Municipalities, Mysore District, while referring to the above Government Order, reported that the Board was not in a position to finance or maintain such a scheme Unless the question of funds is first settled, there seems no use in further considering the project

I have the honour to be,

Sir,

Your most obedient servant,

C Vijayaraghava

Chief Engineer of Mysore

MM

V N.S

Docket no 434 of 2nd July 1908 from the Treasurer Enquiries, Water Supply and Sewerage Branches to the Chief Engineer of Harbours and Rivers

Chief Engineer's no 41/1907 dated 16-5-1908 forwarding copy of letter no 9322-1/2 and 308-09-2 dated 6-6-1908 from the Secretary to Government, General and Revenue departments and calling for report on the unsatisfactory condition of the Numeea Water Supply

With reference to the above I have the honour to report that the undersigned has inspected the water works carefully on 31-1-1908. The filter beds and pure water tank are good but their situation is such that only a very limited portion of the town can be commanded by the present system. The result is that the people living almost in 3/4 of the town do not get the benefit of the water supply But the undersigned would propose doing away with the sand filters as they are not properly looked after and substitute Jewell filters. To ensure a constant and satisfactory supply throughout the town a pumping scheme is the only practical one A complete pumping plant would be-

[illegible] jewelled filters and a balancing tank at different parts of the town similar to the system installed at Harihar and Shimoga will cost not less than Rs 35,000/- And the maintenance charges will amount to Rs 4000/- per annum If the Municipality are prepared to meet this expenditure then a complete scheme will be worked out. But the Municipality have been repeatedly pleading their inability to meet any small expenditure (Please see the references quoted in the margin) and as such they could not expect for an improved water supply.

President of Municipalities No 116 dy 21/11/(07)

Govt Proc No 4022/MO 126-06-1 dy 7th November 1907

The Municipality may be once more informed that if they could ensure the scheme either by a grant from Government or borrowing in the Public market a complete scheme could be worked They must also provide for ways and means to pay the annual working Charges

To

K R Sreenivasa Iyengar Esquire , M A ,

Secretary to the Government of Mysore,

General and Revenue Departments

Sir,

Adverting to your letter No 9194/M1 308-09-8 dated 31-5-1912 forwarding copies of certain communications between Government and the Chief Engineer anent the water supply to the Hunsur town, I have the honour to state that the Executive Engineer, Water Supply and Stores Division visited the Hunsur town and attended the Municipal Meeting held on 2-2-13 The following two questions appear to have been discussed -

(i) whether it is possible to reduce the original cost (Rs 35000/-) of pumping scheme and maintenance charges (Rs 4000/-)

(ii) whether it is feasible to have a water wheel for 6 months in the year and a pumping plant for the other period of the year as suggested by some of the Municipal Councillors

It was proposed by the Councillors that the initial cost might be reduced by omitting the provision made on account of Jewell filters The Executive Engineer is however of opinion that the proposed initial cost of Rs 35000, is for the entire installation, that this expenditure may be spread over 2 or 3 stages, that a sum of Rs 15000 is sufficient for the present, to install a steam pumping plant and lay a new main to the highest point of the town and that the maintenance charges cannot be reduced to less than Rs 3000/-

As regards the second point viz , erecting a water wheel in addition to a steam plant, the Executive Engineer opines that the initial cost of this scheme will not be less than Rs 40000/- or 50000/- as new filters and P W Tanks have to be constructed and a long length of main has to be laid and that the proposal would

would involve the building of new filters and pure water tank in lieu of the existing ones He states that the water supply to Hunsur town can be improved to a very great extent by an outlay of Rs 15000/- in the 1st instance

The Municipal Council are of opinion that in considera-tion of the low financial condition of the Municipality the initial cost may be met from State Funds, the maintenance charges being met from Municipal funds from the marginally noted sources The Council further pray that the balance of the existing loan viz , Rs 5500/- may be remitted by Government to enable them to utilise the annual provision made for the discharge of the loan for meeting the maintenance cost The President of the Council is also of the same opinion

The question of improving the present system of water supply to Hunsur town has been a long pending one and has been discussed several times at the Representative Assembly Under the existing system the whole town is not being supplied with pure filtered water and the periodical out-breaks of cholera and Plague are reported to be due to the water scarcity Though the initial cost of pumping scheme is estimated to be Rs 35000/- the Executive Engineer hopes to to install a steam purping plant and lay a new main to the highest point of the town with a ~~strong~~ storage tank at cost of Rs 15000 for the present He proposes to erect a pumping plant near the present filter beds and utilise the existing installation of filters and pure water tank

As the Municipality cannot bear the initial cost for want of funds and as there is no immediate prospect of improving the finances by other means I request that Government may be pleased to favourably consider the pro-posals of the Municipal Council

The entire correspondence ends with Mysore Divisi

GRS 27]

GENERAL AND REVENUE SECRETARIAT

(Continuation sheet draft form)

Order thereon No 11082-3
ml3 08 09
Dy 6 5 14

The Executive Engineer of the Water Supply and Stores Division states that a new pumping plant ~~would be required~~ as necessary in order to give a pressure supply to all parts of the Municipal Town and roughly estimates the cost of a pumping Scheme at Rs 35,000/ with a maximum expenditure of Rs 3,000/- per annum on account of maintenance He is further of the opinion that the project can be worked out in two stages 7 The Municipal Council of Mysore have resolved to put in hand the first stage of the works costing Rs 15,000/ and ~~to~~ have approached Govt with a prayer to meet the entire capital cost of improvement of the water Supply and also to remit the balance of R-.

outstanding against them on 1st July 1913 out of the loan granted for the first water supply project. As regards the annual maintenance charge of Rs 3,000/ they propose to meet it from the following sources —

(a)	Imposing Water rate	Rs 1,600
(b)	Saving of present water maintenance charges	400
(c)	Saving the present loan instalment of loan with interest	750
(d)	Revising taxes	250
	Total	3,000

3. Govt have carefully considered the proposals of the Honour Municipal Council but find that their expectations are too sanguine, and that their financial condition is not such as to enable them to provide satisfactorily for annual maintenance charges amounting

G.I.B—10 000—18 11 11

GRS 27]

GENERAL AND REVENUE SECRETARIAT

(Continuation sheet draft form.)

amounting to Rs 3000/ even leaving the depreciation charges out of account

4 Further, Govt are not in favour of meeting the entire Cost of the project from State Funds

5 Govt, therefore direct that the project shall be over sunk such time as the Mc Cl can suitably finance the Scheme, and also find funds for the annual maintenance and depreciation charges

6 The Honour Mc Cl will do well to repay the entire balance of the loan outstanding against them, from their Closing balance, as they would thereby save the annual interest thereon
